Bay Area Engineering
Council Representative
Eric Worrell

This year brought some unique and exciting events to the San Francisco section. All of the members of our team had an enjoyable experience. This made the volunteer hours a very light bundle. Additionally, we were able to lay the foundation for a good 1986 thru 1987 year for the incumbents.

HONORS AND AWARDS

This is certainly the best excuse a section can make for a meeting. We had our fair share of excuses. Betz Bornstien was conferred as an ASME fellow. He was recognized for.....

F.W. Beichely was presented with a Distinguished Service Award. His dedication to the society is legendary. A large group, constituting an ASME West Coast "Who's Who", attend this gala. Tales of "Beich's" dedication and recruitmanship were shared with the audience. Beich, ever the gentleman, received his award with the grace and dignity befitting the award while reaffirming his stature.

The first of the sections 25 year ASME members were recognized at our March meeting. The award was warmly received by the 6 who were recognized. We plan to continue presenting certificates to all who are eligible. This effort should last well into next year.

HISTORY AND HERITAGE

The PG&E Geyser station number one was acknowledged for pioneering commercial scale electrical generation from natural steam. This event coincided with the 25 year anniversary of plant operation. We were extremely fortunate to have the plaque presented by Nancy Fitzroy, President-elect, to PG&E's President S.... Governor Duekmajian was also able to attend the dedication.
